XM Series (half width, silver or black face plate)

XM CD	Burr Brown PCM1716 24bit DAC; high-stability crystal clock; remote; 1 SPDIF/BNC, 1 TOS digital out	1690
XM3	High capacity custom toroidal transformer; high quality resistors and capacitors for signal path; all discrete transistor audio stages; separate MM and MC inputs selectable on back panel; adjustable loading and gain	890
XM5	High capacity custom toroidal transformer; high quality resistors and capacitors for signal path; Cascode circuitry for improved psu immunity; fast bipolar output transistors; 2x 60w @ 8ohm; 5 digital (1 USB, 2 BNC, 2 TOS), 1 phono MM, 1 line in, 1 AV direct in, 1 pre out; remote	1690
XM7	High capacity custom toroidal transformer; high quality resistors and capacitors used in signal path; audio output stages use discrete transistors; 5 digital (1 USB, 2 BNC, 2 TOS), 1 phono MM, 1 line in, 1 AV direct in; 1 jack and 1 mini-jack headphone out, 2 pre out; remote	1690
XM9 (pair)	High capacity custom toroidal transformer; high quality resistors and capacitors for signal path; Cascode circuitry for improved psu immunity; Toshiba bipolar output transistors; DC coupled throughout; electronic non-invasive overload protection; 1 balanced, 1 unbalanced in selectable by internal jumper; 1x 80w @ 8ohm	1990
XM HP Headphone Amplifier	High capacity custom toroidal transformer; high quality resistors and capacitors used in signal path; audio output stages use discrete transistors with high drive capability for low impedance headphones; 5 digital (1 USB, 2 BNC, 2 TOS), 1 phono MM, 2 line in; 2 jack and 2 4pin XLR headphone out, 1 monitor out, 1 pre out; remote	1790

VXN Series (half width, black face plate only)

VXN Active Crossover 2 Way	Dual mono construction using separate PCBs; only discrete transistors in active circuitry; usage of very low noise regulators; level setting by DIP switches for best sound quality; very high quality capacitors (1% tolerance) used in the signal path for accurate setting of frequency roll off	1990
VXN Active Crossover 3 Way	As above, but 3 Way	2290
VXN Power Supply	High capacity custom made shielded transformer; high speed rectifier diodes; multiple capacitors used for low ESR	1290

2010S2 Series (full width, silver or black face plate)

2510 Integrated	High capacity custom toroidal transformer; high quality resistors and capacitors for signal path; Cascode circuitry for improved psu immunity; fast bipolar output transistors; 2x 75w @ 8ohm; 1 phono MM, 4 line in, 1 AV direct in, 1 pre out; remote	1890
-----------------	---	------

3010S2 Series (full width, silver or black face plate)

3010S2 D Integrated	High capacity custom toroidal transformer and psu regulators; fast bipolar output transistors; 2x 110w @ 8ohm; separate pre-amp output with class A buffer stage; 5 line in, 1 AV direct in, optional phono card (MM or MC) or DAC card (1 USB and 1 BNC in), 2 pre out, 1 tape out; remote	2690
3010S2 D Preamplifier	Pre-amp with class A buffer stage; 5 line in, AV direct int, optional phono card (MM or MC) or DAC card (1 USB and 1 BNC in), 2 pre out, 1 tape out; remote	1690
3010S2 Stereo Power	High capacity custom toroidal transformer and psu regulators; fast bipolar output transistors; 2x 110w @ 8ohm	1790
3010S2 Mono Power (pair)	High capacity custom toroidal transformer and psu regulators; fast bipolar output transistors; DC coupled; 1x 100w @ 8ohm	2990
3010S2 Phono Card	Optional phono card (MM or MC); selectable gain and loading	440
3010S2 DAC Card	Optional DAC card; SPIDF in up to 24bit/192kHz, USB in native DSD playback	660

5010 Series (full width, silver or black face plate)

5010 Preamplifier	Pre-amp with class A buffer stage; DC coupled balanced pre amp output; large custom made toroidal power transformer and multiple smoothing capacitors for power supply; 6 line in, 1 AV direct in, 1 balanced, 2 unbalanced out; optional phono card (MM or MC) or DAC card (1 USB and 1 BNC in), 1 tape out; remote	2990
5010 Mono Power (pair)	Large custom made toroidal transformer and screw terminal smoothing capacitors for power supply; all bipolar transistor design using carefully selected parts; DC coupled throughout; electronic, non-invasive overload protection and thermal trip; 1x 200w @ 8ohm; 1 balanced, 1 unbalanced in	6690
5010 Phono Card	Optional phono card (MM or MC); selectable gain and loading	440
5010 DAC Card	Optional DAC card; SPIDF in up to 24bit/192kHz, USB in native DSD playback	660
